

Consolidated Financial Results for the Year Ended December 31, 2014
[Japanese GAAP]

Described below is an abstract in English of the financial result for the fiscal year ended December 31, 2014 that was released today in Tokyo. The translation is prepared and provided for the purpose of the readers' convenience only. All of readers are strongly recommended to refer to the original version in Japanese of the news release for complete and accurate information.

Company name: Kenedix, Inc.	Listing: First Section, Tokyo Stock Exchange
Stock code: 4321	URL: http://www.kenedix.com
Representative: Taisuke Miyajima, CEO & President	
Contact: Masahiko Tajima, Director	Tel: +81-3-5623-8400
Scheduled date of General Meeting of Shareholders: March 25, 2015	
Scheduled date of payment of dividend: March 26, 2015	
Scheduled date of filing of Annual Securities Report (<i>Yuka Shoken Houkokusho</i>): March 25, 2015	
Preparation of supplementary materials for financial results: Yes	
Holding of financial results meeting: Yes (for institutional investors and securities analysts)	

(Amounts rounded off to million yen)
1. Consolidated Financial Results (Jan. 1, 2014 – Dec. 31, 2014)
(1) Consolidated results of operations *(Percentage figures for revenue and incomes represent year-on-year changes)*

	Revenue		Operating income		Ordinary income		Net income	
	Million yen	%	Million yen	%	Million yen	%	Million yen	%
Year ended Dec. 31, 2014	26,212	16.7	8,147	17.8	6,406	31.3	4,844	143.9
Year ended Dec. 31, 2013	22,456	7.2	6,914	18.5	4,878	109.5	1,985	-

Note: Comprehensive income (million yen) Year ended Dec. 31, 2014: 6,591 (148.5%) Year ended Dec. 31, 2013: 2,652 (-%)

1. Analysis of Results of Operations and Financial Position

In 2014, Japan's economy showed signs of weakness due to the downturn in demand following the rush to buy prior to the April 2014 consumption tax hike and to the higher cost of raw materials as the yen depreciated. But economic indicators are currently recovering because of rebounds in exports, capital expenditures and housing investments along with a steady improvement in jobs and personal income. As a result, the drop following the consumption tax hike has ended and Japan's economy appears to be poised to recover at a moderate pace.

Overseas, economies are recovering and expanding slowly in the United States and other industrialized countries. However, there are a number of sources of uncertainty. Economic growth is slowing in Europe, the price of crude oil has plummeted, the end of US monetary easing is impacting markets in emerging countries, and there are geopolitical risk factors. These events may have an effect on Japan's economy, too.

In the real estate services and real estate finance sectors, where the Kenedix Group operates, the decline in the real estate leasing market has ended and a recovery has started. Average vacancy rates and average monthly leasing rates are rebounding, primarily at high-quality properties. Furthermore, competition among buyers of real estate has become somewhat overheated, chiefly among Japanese real estate companies and overseas funds. Large properties in central Tokyo are being sold at relatively low expected returns as a result. Although real estate purchases by J-REITs were less than in 2013, activity in the REIT market remained high. Market capitalization of all J-REITs surpassed 10 trillion yen as IPOs raised the number of J-REITs, many J-REITs issued more stock, and more J-REIT buying by the Bank of Japan boosted their investment unit prices.

The Kenedix Group has been making good progress concerning the goals of the medium-term management plan that was announced on February 14, 2013 and reached these goals one year early.

(1) Analysis of Results of Operations

a. Summary of the fiscal year

There have been many activities in 2014 to build a stronger base for growth. Sales of consolidated properties continued and the proceeds from these sales, along with funds procured from the stock offering in 2013, were being used for investments and other actions.

There were many activities during 2014 that contributed to growth in assets under management. Office REIT and residential REIT managed by subsidiary Kenedix Real Estate Fund Management, Inc. sold stock to procure funds that were used to buy more properties. In addition, the private REIT Kenedix Private Investment Corporation started operations in March. Premier REIT Advisors Co., Ltd., which manages Premier Investment Corporation, joined the Kenedix Group as an affiliate. In another move to add assets under management, Kenedix has started making preparations for the establishment and stock listing of a retail J-REIT and a senior healthcare J-REIT.

Another significant event of the year was the establishment of Kenedix Property Management, Inc. All of these activities are aimed at building a stable base of operations by expanding businesses that are steady sources of fee income as well as further diversifying the operations of the Kenedix Group.

At the end of 2014, assets under management (AUM) totaled 1,480.6 billion yen. This was a net increase of 274.3 billion yen (22.7%) from the end of 2013.

Interest-bearing debt on a consolidated basis at the end of 2014 was 40,589 million yen more than at the end of 2013 because of the establishment of new funds for further growth. However, this debt was only 52.5% of total assets and the average interest rate on this debt decreased from 2.0% in 2013 to 1.4% in 2014. As a result, Kenedix was able to preserve its financial soundness while lowering interest and other financial expenses.

In 2014, consolidated revenue was up 16.7% year on year to 26,212 million yen, operating income increased 17.8% to 8,147 million yen, ordinary income increased 31.3% to 6,406 million yen and net income increased 143.9% to 4,844 million yen.

The following section explains performance by business segments.

1) Asset Management Business

In the Asset Management Business, asset management fees were stable and there was an increase in incentive fees, which are received based on the performance of a fund when it ends, and disposition fees, which are received when properties are sold. The result was a 19.6% (1,421 million yen) increase in revenue to 8,654 million yen and an 11.5% increase in operating income to 4,347 million yen.

2) Real Estate Investment Business

In the Real Estate Investment Business, revenue declined 17.9% (1,680 million yen) to 7,712 million yen because of a decrease in revenue from real estate sales. On the other hand, operating income increased 28.5% to 2,680 million yen because of gains on the sale of real estate, dividend income from investment in TK, and an increase in rental revenue due to growth in consolidated properties.

3) Real Estate Leasing Business

In the Real Estate Leasing Business, leasing revenue was higher as rental revenue increased along with growth in properties held in principal accounts. In addition, there was a growth in master lease revenue and rent income at Space Design, Inc., which became a consolidated subsidiary in 2013. The result was a 67.6% increase in revenue to 10,852 million yen and a 39.8% increase in operating income to 2,556 million yen.

b. Outlook for 2015

Kenedix expects revenue of 21,600 million yen, operating income of 7,500 million yen, ordinary income of 6,700 million yen and net income of 6,000 million yen in 2015. Based on the basic policies of its new medium-term management plan, Kenedix is aiming at: growth of stable earnings backed mainly by the Asset Management Business; growth of the Real Estate Investment Business primarily by using co-investments; and achieve the proper balance between financial soundness and the distribution of earnings to shareholders.

(2) Analysis of Financial Position

Balance Sheet Position

Total assets were 203,268 million yen as of December 31, 2014, 54,869 million yen more than as of December 31, 2013. Growth in properties held in principal accounts resulting from the establishment of new real estate funds and an investment in Kenedix Private Investment Corporation were mainly responsible for the increase in total assets.

Total liabilities increased 43,859 million yen to 117,916 million yen. Most of this increase was the result of growth in loans associated with the establishment and consolidation of new real estate funds.

Net assets increased 11,009 million yen to 85,351 million yen mainly because of net income and the increase in minority interests.

In some cases, consolidated subsidiaries use non-recourse loans to procure funds to acquire properties. Such loans are solely the responsibility of the subsidiary holding the properties, and loan repayments can be no greater than cash flows from assets held by the subsidiary. Consequently, these non-recourse loans should be excluded from consideration when analyzing the Group's debt-equity ratio.

The following table presents changes in the debt-equity ratio.

Reference: Cash flow indicators

(Millions of yen)

	Dec. 2010	Dec. 2011	Dec. 2012	Dec. 2013	Dec. 2014
Interest-bearing debt (1)	123,625	109,767	63,623	66,025	106,615
(Non-recourse loans included) (2)	(69,764)	(60,444)	(21,640)	(28,347)	(82,888)
Net assets (3)	71,147	71,435	56,071	74,341	85,351
Cash and deposits (4)	10,913	7,706	13,813	25,795	28,546
Net debt (5) ((1)-(2)-(4))	42,947	41,617	28,168	11,883	(4,819)
Net debt-equity ratio net of non-recourse loans (5)/(3) (%)	60.4	58.3	50.2	16.0	(5.6)

Cash Flows

Operating activities provided net cash of 9,379 million yen, financing activities provided net cash of 44,320 million yen and investing activities used net cash of 50,797 million yen. The result was an increase of 1,537 million yen in cash and cash equivalents during 2014 to 31,159 million yen as of the end of December 2014.

Operating Activities

Net cash provided by operating activities was 9,379 million yen, compared with 2,787 million yen used in 2013. This was mainly attributable to income before taxes of 3,930 million yen, and an increase in inventories of 5,085 million yen.

Investing Activities

Net cash used in investing activities was 50,797 million yen compared with 8,947 million yen provided in 2013. This was mainly attributable to the payments of 94,149 million yen for the purchase of property and equipment due to new consolidation, while there were proceeds of 49,779 million yen from the sales of property and equipment.

Financing Activities

Net cash provided by financing activities was 44,320 million yen, compared with 9,036 million yen used in 2013. This was mainly attributable to increases in non-recourse long-term borrowings, non-recourse bonds payable and short-term non-recourse borrowings due to new consolidation, and the proceeds of 6,447 million yen from minority interests. Minority interests represent primarily the investments of external parties in funds consolidated by the Group.

(3) Basic Policy for Allocation of Earnings and Dividend for 2014 and 2015

Kenedix positions the distribution of earnings to shareholders as one of its highest priorities. The basic policy regarding dividends is to make continuous dividend payments in line with consolidated operating results. The dividend for each year is determined by taking into account all applicable factors, including operating results, the need to retain earnings to generate growth, the dividend payout ratio and other items.

In 2014, there were many initiatives for building a profit structure that can be consistently profitable. These actions were based on the medium-term management plan. Due to these initiatives, net income was 4.8 billion yen in 2014.

Due to the results of operations in 2014, Kenedix plans to resume dividend payments for the first time since the dividend applicable to 2007 by making a year-end payment of 3 yen per share applicable to 2014.

In 2015, Kenedix started a new three-year medium-term management plan called Partners in Growth 2017. The one of the basic policies of this plan is to increase stable earnings mainly through growth of the Asset Management Business. As part of this goal, one priority will be the consistent payment of a dividend that is supported by base earnings* derived from stable earnings.

* Base earnings are gross operating income from the Asset Management Business and Real Estate Related Business less selling, general and administrative expenses. Kenedix has changed its business segments in 2015. Please see the presentation materials for Results of Operations for the Fiscal Year Ended December 31, 2014 dated February 10, 2015 for more information about the new business segments.

(4) Business Risk

The following is a list of items that may have a significant effect on investors' decisions. The Group is aware of these risks and is taking actions to prevent the occurrence of the problems and respond as necessary should a problem arise. Forward-looking statements in the document are based on the judgments of the Group's management as of the end of the fiscal year under review.

1) Economic downturn

The Group is engaged in the provision of real estate investment services and of real estate asset management services. An economic downturn, resulting from financial, political, or other factors whether in Japan or abroad, could depress real estate market conditions, for instance, by dampening interest in real estate investment, stifling real estate transactions, raising vacancy rates, and bringing down leasing rates. These events could adversely affect the Group's operating results.

2) Losses related to the re-valuation and impairment of assets invested in

The Company acquires real estate on its own investment account, as well as invests in real estate funds established by the Group. The value of assets invested in can be affected by re-valuation or asset impairment, or upon sale of the real estate, by losses from sales. These events could adversely affect the Group's operating results.

3) Fund procurement

The Group raises necessary funds through borrowings from financial institutions and the issuance of bonds, and carries out steady refinancing of its bank borrowings. There is a possibility that financial institutions may restrain their lending activities because of depressed financial or political conditions, or the Company's relationship with its creditors may deteriorate, or its credit worthiness (including credit rating) may substantially deteriorate. In any of these events, the Group may not be able to refinance its borrowings, or be forced to sell real estate owned by the Group on unfavorable terms in order to procure sufficient funds. This may adversely affect the Group's operating results and financial position.

4) Liquidity in the real estate market

Instability in the economic environment or real estate market may depress liquidity in real estate transactions. As a consequence, it may be impossible to sell real estate owned by the Company or by the Group's real estate funds, or to sell it as planned, or the real estate may have to be sold at unfavorable prices.

This may adversely affect the Group's operating results and financial position.

5) Financial covenant

Some of the Group's bank borrowings are subject to the financial covenants provided in the loan agreements. Infringement on these restrictions and the invocation of acceleration clauses may trigger cross default clauses which do not only require the repayment of these borrowings but of all other outstanding borrowings of and bonds issued by the Company. This would negatively impact the Group's financial position. Also, with certain syndicated loans and other loans extended to the Company, there are restrictions as a covenant, for instance, not to post ordinary losses in the consolidated full-term and interim statements of income. In the case of infringement, there may be a negative impact on the Group's operations, results, and financial position, unless the creditors concerned endorse it as they may refuse a request by the Company not to invoke the acceleration clause.

6) Competition

The performance of the real estate funds offered in the asset management business, the real estate investment business and the real estate leasing business, the Company's core businesses, are expected to face intensified competition as their performance is evaluated relative to various financial products and investments. In the event that real estate funds become less attractive than other types of investments, the Group's operating results may be adversely affected. Especially an early recovery in the real estate market may trigger increased competition.

7) Interest rates

In the event that interest rates rise in the future, the Group would see an increase in its cost of fund procurement as well as in the returns that client investors expect. Higher interest rates could also cause real estate prices to decline. These events may adversely affect the Group's operating results.

8) Recruiting activities

The Group is dedicated to offering competitive services based on the knowledge and experience of its workforce concerning real estate investments. Offering these services requires a team of talented employees. Accordingly, the Company has a policy of recruiting individuals with outstanding skills as required. However, the Company may not be able to hire a sufficient number of these individuals or may have to deal with a large defection of talented employees. These events could have an effect on business operations and may also adversely affect the Group's operating results.

9) Changes in laws and regulations

The Group is conducting its business activities in conformity with all currently applicable laws and regulations and subject to the risks associated with these laws and regulations. However, any future changes in these laws and regulations could have a negative impact on the Group's business activities. The Group is primarily subject to the following laws and regulations: Financial Instruments and Exchange Law, Building Lots and Buildings Transaction Business Law, the Law Concerning Investment Trusts and Investment Corporations, Soil Contamination Countermeasures, the Special Measures Law Concerning the Claims Servicing Business, Money Lending Law, and the Law for Architects and Building Engineers.

Due to the enactment of the Financial Instruments and Exchange Law in Japan, the real estate funds managed by the Group are now subject to the provisions of this law. Future changes to the laws and regulations or their interpretation and application may affect the Group's operating results.

10) Geographical bias and risk of disaster damage to real estate value

Most properties that the Group invests in, owns, or manages are located in the Tokyo area. Any deterioration in the economic conditions in this area may affect the Group's operating results. Also, the Tokyo area and other regions where the Group's properties are located may be subject to earthquakes, wars, terrorism, fires and other disasters. Such events could reduce the value of these properties, negatively affecting the Group's operating results and financial position.

11) Medium-term management plan

The Group has established a medium-term management plan in February 2015 that covers the three-year period from 2015 to 2017. Based on this plan, the Group is aiming at: (1) Increase stable earnings mainly through growth of the Asset Management Business, (2) Expand the Real Estate Investment Business primarily by using co-investments, and (3) Achieve the proper balance between financial soundness and shareholder distributions. The Group will take numerous actions aimed at achieving the goals of the medium-term management plan.

The Group will continue to take the actions outlined above. However, operational changes and changes in the environment, including fund procurement, liquidity in the real estate market, and other economic aspects, may make it impossible to realize the management plan.

12) Risks associated with defects and other problems involving real estate

Real estate, the primary asset in which the Group invests, has the potential of having defects and problems involving holders of rights, soil conditions, structural integrity of buildings and other items. Prior to acquiring a property, the Group conducts a rigorous due-diligence. However, the Group may incur unexpected costs to resolve defects, falsified structural designs, and other problems that emerge following an acquisition. These expenses may have a negative effect on the Group's operating results and financial position.

13) Mergers and acquisitions, equity alliances, and other actions

The Group views mergers and acquisitions and equity alliances as effective means of achieving growth. Such actions will be taken only when they will contribute to growth in assets under management or diversification of real estate investments, and generate synergies with existing businesses.

The Group will conduct thorough examinations and take steps to reduce all risks prior to executing a merger, acquisition or equity alliance. However, it is possible that, after the transaction is finalized, contingent liabilities or other problems may arise or that the counterparty or the Company may not perform as expected. These events may have an effect on the Group's operating results and financial position.

14) Determining of the scope of consolidation

Most of the private funds that are formed and managed by the Group are structured using silent partnership agreements, and ordinarily the investment interest of the operator of the silent partnership is held by the general incorporated association to ensure bankruptcy remoteness. In the real estate fund and NPL investment fund industries the Group belongs to, it is recognized that in these industries the accounting practices for determining control and influence with respect to asset management agreements and servicer agreements under such a structure have not yet been established.

On September 8, 2006 the Accounting Standards Board of Japan released its Practical Issues Task Force (PITF) No. 20, "Practical Solution on Application of Control Criteria and Influence Criteria to Investment Associations," (Last revised on March 25, 2011), and the Group has applied the provisions of this PITF starting with the fiscal year 2006. Currently, the Group determines the scope of consolidation by deciding whether each fund or SPC is a subsidiary or affiliate by individually determining whether the Company exerts control or influence, taking into consideration the asset management agreement or silent partnership agreement.

In the event that accounting practices that differ greatly from the policies that have been adopted by the Company with respect to the determination of the scope of consolidation for SPCs become established as a result of the establishment of new accounting standards or the release of practical guidelines, this could cause substantial changes in the Company's policies for determining the scope of consolidation, having an effect on the operating results and financial position of the Group.

15) Management of personal information

The Group fully understands the importance of handling personal information of tenants and other parties, and stores all these information involved in a responsible way. However, if unforeseen circumstances were to result in an information leak, it may be subject to indemnity charges and thus incur losses, as well as hurt the Group's credibility. This may affect the Group's operating results and financial position.

2. The Kenedix Group

The Kenedix Group is made up of Kenedix, Inc., 52 subsidiaries and 14 affiliates. The operations of the Group consist of three business sectors: (1) asset management, (2) real estate investment, and (3) real estate leasing. These business segments are the same as the segment classifications listed in the section “Segment Information.”

(1) Asset Management Business

The asset management business provides real estate investors, which are the clients of Kenedix, with a return on their investments by providing investment opportunities concerning real estate, loans backed by real estate, and other assets and services for the operation and management of real estate (asset management service). In return for the provision of these services, we receive fees that can be divided into the following four general categories.

1) Acquisition fees: Fees received for providing real estate investors with investment opportunities

- We locate properties that match the needs of real estate investors and use funds in which our investors have contributed to purchase real estate and other assets.
- When we purchase real estate and other assets, we receive a fee that is a certain percentage of the purchase price.

2) Asset management fees: Fees received for the management of investments in real estate

- Our goal is to increase the value of assets by operating and managing real estate and other assets in a manner that preserves and increases revenue.
- We submit reports to real estate investors concerning the operations of portfolio properties.
- In return for these services, we receive a fee that is usually calculated as a certain percentage of the aggregate purchase prices of portfolio assets.

3) Disposition fees: Fees received in association with sales of real estate and other assets and the recovery of capital

- We earn profits by recovering invested capital through sales of real estate and other assets.
- When a property is sold, we receive a fee that is a certain percentage of the sales price.

4) Incentive fees: Fees received for achieving a particular return on investment

- When an investment reaches completion after all real estate and other assets have been sold, we receive a fee that is equal to part of the return, if any, that exceeds the target return that was determined in advance with the investors.

In addition to these four major categories of fees in the asset management business, we receive brokerage fees when we serve as a broker for a transaction, consulting fees when we use our real estate investment expertise to provide consulting and advisory services, and other types of fees.

(2) Real Estate Investment Business

The real estate investment business involves the ownership of real estate directly by the Group. In some cases, real estate is held temporarily prior to inclusion in a fund in order to facilitate the efficient establishment of a fund. In other cases, properties are held jointly in order to align the interests of a fund with those of the Group or held for other reasons. In addition, we purchase non-performing loans (NPL) for the purpose of making pure investments. Revenue in this business consists of the following items.

1) Leasing revenue

- This is leasing revenue from real estate for sale.

2) Revenue from real estate sales

- The sale of real estate for sale generates this revenue.

3) Dividend income from investment in TK

- As part of the asset management business, the Company makes minority equity investments with real estate investors, which are the client of Kenedix, in the funds that the Company has established and manages.
- Dividend income from investments in TK is the Company's share of the earnings or losses from funds.

4) Valuation loss of inventories

- The Company marks to market its real estate for sale at the end of each quarter.
- When the fair value of real estate for sale falls below book value, we record the difference as an inventory valuation loss.

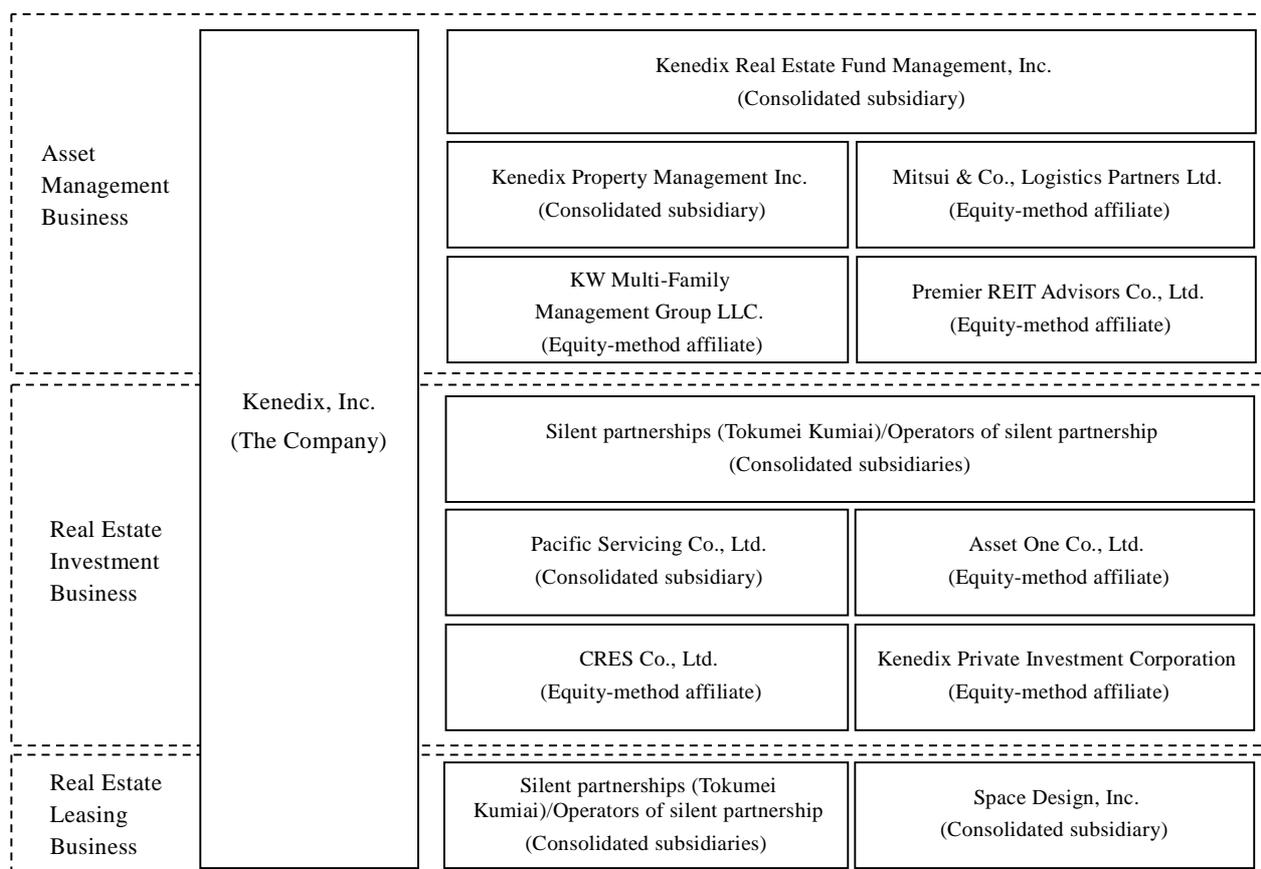

5) Gain/loss on sales and collection of acquired NPL

- The Company uses its expertise in real estate investing to invest in NPL.
- We record a profit or loss when we sell or collect an NPL that we have purchased.

(3) Real Estate Leasing Business

The real estate leasing business mainly involves the leasing of land and buildings that are long-term holdings classified as fixed assets. Our goal is to increase the value of these assets by raising their profitability. We plan to accomplish this by strengthening leasing operations to increase occupancy rates and by streamlining the management of real estate to cut expenses in this business.

A summary of the structure and activities of the Group is shown below.

3. Management Policies

(1) Fundamental Management Policy

The Group is an organization specializing in real estate services and real estate finance. The Group's overall goal is to maximize returns on investments to the real estate investors, which are clients of Kenedix. This is accomplished by leveraging the Group's comprehensive research skills and extensive knowledge of the real estate business to accurately analyze and evaluate trends in a constantly changing market.

The Group will retain its commitment to meeting targets and to sincerity. Our goal is to establish long-term relationships based on trust with clients, employees and investors and to comply strictly with laws, regulations and other guidelines. By taking these actions, the Group is determined to maximize its corporate value in order to contribute to society.

(2) Medium- and Long-term Management Strategy, Targeted Performance Indicators, and Important Management Issues

In accordance with the above fundamental management policy, the Group has established a medium-term management plan called Partners in Growth 2017 that covers the three-year period ending in 2017. This plan includes the following basic policy, quantitative plan and major initiatives.

(1) Basic policy

- a. Increase stable earnings mainly through growth of the Asset Management Business
- b. Expand the Real Estate Investment Business primarily by using co-investments
- c. Achieve the proper balance between financial soundness and shareholder distributions

(2) Quantitative plan (consolidated)

	Numerical targets
Increase stable earnings	Base earnings ^{*1} : 4 billion yen (2017)
Improve capital efficiency	Three-year average ROE ^{*2} : 8.0%

*1: Base earnings are gross operating income from the Asset Management Business and Real Estate Related Business less selling, general and administrative expenses. Kenedix has changed its business segments in 2015. Please see the presentation materials for 2014 results of operations dated February 10, 2015 for more information about the new business segments.

*2: The three-year average ROE is the return on equity in each year which is calculated by dividing net income by the average of equity at the beginning and end of each year.

These two targets do not incorporate the effects of goodwill resulting from acquisitions.

(3) Major initiatives

- a. Increase stable earnings mainly through growth of the Asset Management Business

The goal is to build a more powerful profit structure centered on the Asset Management Business by taking the following actions.

- Use asset management expertise to expand AUM in many categories
- Add new categories of AUM, such as health care and infrastructure
- Offer more non-asset real estate services and provide services that raise the value of AUM
- Expand overseas operations by forming ties with new investors, making more overseas investments and other activities
- Further strengthen administrative operations, the foundation for improving asset management skills and the quality of services

b. Expand the Real Estate Investment Business primarily by using co-investments

Manage a real estate investment portfolio with emphasis on earning returns and sustaining growth while preserving the proper balance between recovering current investments and making new investments.

- Make co-investments with client investors
- Make investments that contribute to the growth of other Kenedix businesses (with emphasis on investments in retail and healthcare facilities)
- Upgrade monitoring and risk management for the investment portfolio
- Maintain an allocation of funds that anticipates upcoming changes in market conditions

c. Achieve the proper balance between financial soundness and shareholder distributions

Maintain the proper balance among financial soundness, the return on equity and shareholder distributions while taking into account the cycle of the real estate market.

- Hold non-consolidated debt to a suitable level for financial soundness
- Maintain the proper balance between real estate investments and equity
- Pay a dividend every year based on base earnings
- Increase retained earnings to support the timely and flexible distribution of earnings to shareholders

4. Consolidated Financial Statements**(1) Consolidated Balance Sheets***(Millions of yen)*

(5) Notes to the Consolidated Financial Statements**Going Concern Assumption**

Not applicable.

Notes to Significant Matters Providing the Basis for the Preparation of Consolidated Financial Statements

1. Matters concerning the scope of consolidation

(1) Number of consolidated subsidiaries: 44

Names of principal consolidated subsidiaries
Kenedix Real Estate Fund Management, Inc.

Kenedix Development, Inc.

Pacific Servicing Co., Ltd.

Space Design, Inc.

Kenedix Property Management, Inc.

Kenedix Westwood, LLC

Kenedix GP, LLC

37 other subsidiaries

(2) Number of non-consolidated subsidiaries: 8

Names of non-consolidated subsidiaries

Kenedix Master Tk, LLC

Kenedix Insurance Agency, Inc.

Japan Senior Living Partners Co., Ltd.

5 other subsidiaries

Reason for exclusion from the scope of consolidation

In accordance with Article 5, Paragraph 1, Item 2 of the Regulations for Consolidated Financial Statements, non-consolidated subsidiary Kenedix Master Tk, LLC was excluded from the scope of consolidation as it is the operator of silent partnership contracts and the value of its assets and income or losses attributable to the Group was effectively small.

In addition, non-consolidated subsidiaries Kenedix Insurance Agency, Inc., Japan Senior Living Partners Co., Ltd. and 5 others were excluded from the scope of consolidation, as they are small-scale businesses with none of their combined total assets, net sales, net income or loss (amounts equivalent to the Company's interests in these subsidiaries) or retained earnings (amounts equivalent to the Company's interests in these subsidiaries) having material impact on the Consolidated Financial Statements.

2. Matters concerning application of the equity method

(1) Number of affiliates accounted for under the equity method: 13

Names of principal affiliates

Mitsui & Co., Logistics Partners Ltd.

Asset One Co., Ltd.

CRES Co., Ltd.

KW Multi-Family Management Group, LLC

Touchstone Holdings Co., Ltd.

Kenedix Private Investment Corporation

Premier REIT Advisors Co., Ltd.

6 other affiliates

(2) Principal non-consolidated subsidiaries and affiliates not accounted for under the equity method

1) Number of non-consolidated subsidiaries not accounted for under the equity method: 8

Kenedix Master Tk, LLC

Kenedix Insurance Agency, Inc.

Japan Senior Living Partners Co., Ltd.

5 other subsidiaries

2) Number of affiliates not accounted for under the equity method: 1

Topaz Private Debt I LPS

Reason for exclusion from the scope of application of the equity method

In accordance with Article 10, Paragraph 1, Item 2 of the Regulations for Consolidated Financial Statements, Kenedix Master Tk, LLC, a non-consolidated subsidiary not accounted for under the equity method, was excluded from the scope of

application of the equity method, as it is the operator of silent partnership contracts and the value of its assets and income or losses attributable to the Group was effectively small.

In addition, Kenedix Insurance Agency, Inc., Japan Senior Living Partners Co., Ltd., Topaz Private Debt I LPS and 5 other non-consolidated subsidiaries not accounted for under the equity method were excluded from the scope of application of the equity method because the impact of each of their net income or loss (amounts equivalent to the Company's interests in these subsidiaries) and retained earnings (amounts equivalent to the Company's interests in these subsidiaries), etc. were little and these subsidiaries, as a whole, were insignificant.

(3) Accounting for affiliates accounted for under the equity method employing different accounting closing dates

In respect of the financial statements of 8 affiliates accounted for under the equity method, the Consolidated Financial Statements applied their provisional financial statements closed on either the consolidated closing date or a specific date.

In this case, appropriate adjustments were made for significant transactions that arose between the relevant closing dates and the consolidated closing date.

3. Matters concerning accounting periods of consolidated subsidiaries

Of the consolidated subsidiaries, 14 subsidiaries employed different accounting closing dates from that of the Consolidated Financial Statements but their closing dates do not deviate from the consolidated closing date by more than three months. For these subsidiaries, the Consolidated Financial Statements applied their financial statements as of the respective closing dates. Additionally, for 21 consolidated subsidiaries, the Consolidated Financial Statements applied their provisional financial statements closed on either the consolidated closing date or a specific date within three months of the consolidated closing date.

For any of them, appropriate adjustments were made for significant transactions that arose between the relevant closing dates and the consolidated closing date.

4. Matters concerning accounting standards

(1) Evaluation standards and methods for significant assets

1) Marketable securities

Other securities

Securities with market quotations

Stated at market value at the accounting closing date (unrealized gains or losses are comprehensively reported as a component of net assets and the cost of securities sold is computed using the moving-average method.)

Securities without market quotations

Stated at cost by the moving-average method.

However, investments in silent partnership are stated on an individual specified cost basis. The details are described in "(9) 3) Accounting method for investments in silent partnerships."

2) Derivatives

Market value method

3) Inventories

Real estate for sale (including real-estate trust beneficiary rights)

Primarily stated at cost on an individual specified cost basis (the balance sheet value is computed by the method of devaluing book price to reflect declines in profitability).

Real estate for sale, except those acquired temporarily for the purpose of incorporating in funds structured by the Group, is written off and the depreciation is recorded as cost of revenue. Useful lives of these assets are in general 14-43 years.

(2) Depreciation and amortization method for significant depreciable assets

1) Property and equipment (excluding lease assets)

Straight-line method

Useful lives of principal property and equipment are as follows.

Buildings and structures:	11-50 years
Others (tools, furniture and fixtures):	2-20 years

2) Intangible assets (excluding lease assets)

Software

The costs for software intended for internal use are amortized over an expected useful life of 5 years by the straight-line method.

3) Lease assets

Lease assets are depreciated by the straight-line method over the lease period without residual value.

- 4) Long-term prepaid expenses
Straight-line method
- (3) Accounting method for significant deferred assets
- 1) Stock issuance cost
These costs are fully charged to income when they are paid.
 - 2) Bond issuance cost
These costs are fully charged to income when they are paid.
- (4) Recognition of significant allowances
- 1) Allowance for doubtful accounts
To provide for potential loss on loans, the Group records an allowance for the expected amount of irrecoverable loans. Allowances for ordinary receivables are computed based on the historical rate of default. Allowances for acquired non-performing loans and highly doubtful accounts including receivables where the collection is at risk, consist of the individually estimated uncollectible amounts.
 - 2) Accounting method for retirement benefit obligations
The Group calculates net defined benefit liability and retirement benefit expenses by using a simplified method in which retirement benefit obligations are equal to the amount that would be paid if all employees voluntarily requested benefits at the end of the fiscal year.
 - 3) Provision for contingent loss
To provide for losses from contingencies due to events that are highly likely to occur, a provision is made for expected losses that are estimated based on a reasonable calculation method by taking into account risks and other factors for each contingency.
- (5) Accounting standards for the translation of significant foreign currency-denominated assets and liabilities into Japanese yen
Foreign currency-denominated monetary claims and obligations are translated into Japanese yen, using the spot exchange rates on the consolidated closing date, and the resulting translation gains and losses are recognized as income and losses. Assets, liabilities, income and expenses of overseas subsidiaries are translated into Japanese yen using the spot exchange rates on the consolidated closing date, and the resulting translation gains and losses are recorded as foreign currency translation adjustments under the net assets section.
- (6) Accounting method for significant hedges
- 1) Hedge accounting method
The Group adopts the deferred hedge accounting.
However, exceptional accounting treatments are applied to the interest-rate swaps which meet the requirement of exceptional accounting treatment.
 - 2) Hedging instruments and hedging items
Hedging instruments: Interest-rate swap and interest-rate cap agreements
Hedging items: Borrowings
 - 3) Hedging policy
Based on the internal rules that stipulate the authority concerning derivatives transactions and other regulations, the Group mitigates the risk of interest rate fluctuations associated with the hedging items to a defined level.
 - 4) Method for evaluating hedging effectiveness
Hedging effectiveness is basically measured by comparing the accumulated changes in cash flows of the hedging items with those of the hedging instruments. However, for those to which the exceptional accounting treatments are applicable, the evaluation of hedging effectiveness is omitted.
- (7) Accounting method and period for amortization of goodwill
Goodwill and negative goodwill recognized on and before March 31, 2010 are amortized using the straight-line method over the estimated effective period of their useful lives (generally 10 years).
Goodwill with insignificant value is amortized in a lump sum for the fiscal year it was recognized.
- (8) Cash and cash equivalents in the Consolidated Statements of Cash Flows
Cash and cash equivalents consist of cash on hand, bank deposits which can be withdrawn at any time, deposits held in trust, and short-term investments with the duration of three months or less which can be easily converted to cash and are exposed to little risk of change in value.

(9) Other significant matters for preparation of the consolidated financial statements

1) Accounting method for consumption tax

Transactions subject to consumption tax are mainly recorded at the amount exclusive of consumption tax. However, consumer tax and other taxes imposed on non-tax-deductible assets are recorded as an expense for the fiscal year when they were incurred.

2) Application of consolidated taxation system

The Company and some of the Group's consolidated subsidiaries apply the consolidated taxation system from the current fiscal year.

3) Accounting method for investments in silent partnerships

For the investment in a silent partnership, the Group recognizes the equivalent amount of its interest in the assets of the relevant partnership as "investment securities." The Group records "investment securities" when it makes an investment in a silent partnership. The Group records the equivalent amount of interests in a net gain or loss made by the relevant partnership (including silent partnerships which are affiliates of the Company) as "revenue" or "cost of revenue," while the same amount is either added to or deducted from "investment securities." Redemption of the investment from an operator is recorded by deducting the redeemed amount from "investment securities."

4) Accounting method for deposits of investments in silent partnerships

The Company's consolidated subsidiaries are operators of silent partnerships and commissioned to provide services related to the business. As assets of silent partnerships are attributed to operators, all the assets, as well as gains or losses made by the silent partnerships, are incorporated in the Consolidated Financial Statements and stated on a gross amount basis.

Invested funds in silent partnerships are recorded as "other" under long-term liabilities when the Group receives these funds. The equivalent amount of the investors' interests in net gains or losses made by the silent partnerships are recorded as "profit distribution to silent partnerships," which is presented immediately above "income before income taxes" on the Consolidated Statements of Income, while the same amount is either added to or deducted from "other" under long-term liabilities.

Withdrawal of an investment is recorded by deducting the relevant amount from "other" under long-term liabilities.

Equity interests in silent partnerships which are consolidated subsidiaries of the Company, held by partners of the silent partnerships other than the Group companies are recognized as "minority interests" and profit distributed to such partners other than the Group companies is recorded as "minority interests."

5) Accounting method for trust beneficiary rights in real-estate trusts

For trust beneficiary rights in its real-estate trusts, all assets and liabilities with respect to the asset in trust, as well as income generated, expenses incurred and cash flows with respect to the asset in trust, are recorded in relevant items on the Consolidated Balance Sheets, Consolidated Statements of Income and Consolidated Statements of Cash Flows.

6) Accounting method for acquired non-performing loans

In collection of acquired non-performing loans, the Group subtracts the amount of collection from the acquisition cost of each relevant acquired non-performing loan and records the amount of collection in excess of the acquisition cost as revenue on a net amount basis.

Changes in Accounting Policies

Not applicable.

Changes in Disclosure Method

Consolidated Balance Sheets

Following the application of “Accounting Standard for Consolidated Financial Statements” (Accounting Standards Board of Japan (ASBJ) Statement No. 22, March 25, 2011) in the previous fiscal year, the following items are presented as separate items in the current fiscal year: “non-recourse bonds-due within one year” and “long-term non-recourse borrowings-due within one year,” which were included in “bonds-due within one year” and “long-term borrowings-due within one year” in current liabilities, and “non-recourse bonds payable” and “long-term non-recourse borrowings,” which were included in “bonds payable” and “long-term borrowings” in long-term liabilities. To conform to this change, the Consolidated Financial Statements for the previous fiscal year has been reclassified.

Accordingly, in current liabilities, 19 million yen that was included in “bonds-due within one year” in current liabilities in the previous fiscal year has been reclassified to “non-recourse bonds-due within one year” and 7,211 million yen that was included in “long-term borrowings-due within one year” has been reclassified to “long-term borrowings-due within one year” (6,589 million yen) and “long-term non-recourse borrowings-due within one year” (622 million yen). In long-term liabilities, 2,909 million yen that was included in “bonds payable” has been reclassified to “non-recourse bonds payable” and 52,344 million yen that was included in “long-term borrowings” has been reclassified to “long-term borrowings” (27,547 million yen) and “long-term non-recourse borrowings” (24,796 million yen).

Following the application of the “Accounting Standard for Retirement Benefits (ASBJ Statement No. 26, May 17, 2012) and “Guidance on Accounting Standard for Retirement Benefits (ASBJ Guidance No. 25, May 17, 2012),” “provision for retirement benefits” in the previous fiscal year is presented as “net defined benefit liability” in the current fiscal year.

As the Company applies these accounting standards in accordance with the transitional accounting treatments set forth in Clause 37 of the Accounting Standard for Retirement Benefits, figures have not been reclassified.

Consolidated Statements of Income

“Stock issue expenses” under non-operating expenses, presented as a separate item in the previous fiscal year, is included in “other” in the current fiscal year since the amount is less than 10/100 of total non-operating expenses. To conform to this change, the Consolidated Financial Statements for the previous fiscal year has been reclassified.

Accordingly, “stock issue expenses” (182 million yen) under non-operating expenses shown on the Consolidated Statements of Income in the previous fiscal year is included in “other.”

Consolidated Statements of Cash Flows

“Proceeds from sales of stocks of subsidiaries and affiliates,” which was included in “other, net” under net cash provided by (used in) investing activities in the previous fiscal year, is reclassified as a separate item in the current fiscal year as it has become significant. To conform to this change, the Consolidated Statements of Cash Flows for the previous fiscal year has been reclassified.

Accordingly, “other, net” (0 million yen) under net cash provided by (used in) investing activities shown on the Consolidated Statements of Cash Flows in the previous fiscal year has been reclassified to “proceeds from sales of stocks of subsidiaries and affiliates.”

Changes in Accounting-based Estimates

Not applicable.

Segment and Other Information

Segment information

1. Overview of reportable segments

Segments used for financial reporting are the Group's constituent units for which separate financial information is available and for which the Board of Directors performs periodic studies for the purposes of determining the allocation of resources and evaluating performance.

The Group establishes comprehensive strategies for each product and service of business divisions, consolidated subsidiaries and other organizational units and conducts associated business activities.

Consequently, the Group is divided into the three following reportable segments for individual products and services based on business divisions, consolidated subsidiaries and other organizational units: Asset Management Business, Real Estate Investment Business and Real Estate Leasing Business.

The Asset Management Business establishes investment strategies and provides investment advice concerning real estate, loans backed by real estate, and other assets. This business also operates and manages portfolio properties. The Real Estate Investment Business invests in real estate, loans backed by real estate and other assets that are owned by the Group primarily for warehousing. These assets will be sold to funds established by the Group and to other buyers.

The Real Estate Leasing Business invests in real estate for the Group's own long-term holdings.

2. Calculation method for revenue, profit or losses, assets or liabilities, and other items for each reportable segment

The accounting method used for reportable segments is same as the methods listed in "Notes to Significant Matters Providing the Basis for the Preparation of Consolidated Financial Statements."

Profits for reportable segments are generally operating income figures. Inter-segment sales and transfers are based on market prices.

3. Information related to revenue, profit or losses, assets or liabilities, and other items for each reportable segment

FY2013 (Jan. 1, 2013 – Dec. 31, 2013)

(Millions of yen)

	Reportable segment			Total	Adjustment (Note 1)	Amount recorded in the Consolidated Statements of Income (Note 2)
	Asset Management Business	Real Estate Investment Business	Real Estate Leasing Business			
Revenue						
External sales	6,586	9,393	6,476	22,456	-	22,456
Inter-segment sales and transfers	647	-	-	647	(647)	-
Total	7,233	9,393	6,476	23,103	(647)	22,456
Segment profits	3,900	2,085	1,829	7,814	(899)	6,914
Segment assets	5,483	29,392	89,922	124,798	23,599	148,398
Other items						
Depreciation and amortization	32	0	917	950	9	960
Impairment loss	-	-	48	48	-	48
Investment in equity-method affiliates	246	1,368	-	1,615	-	1,615
Increase in property and equipment and intangible assets	146	2	11,680	11,829	52	11,881

Notes: 1. The (899) million yen adjustment to segment profits includes corporate costs that cannot be allocated to reportable segments.

Corporate costs mainly include general and administrative expenses that cannot be attributed to reportable segments.

The 23,599 million yen adjustment to segment assets includes corporate assets that cannot be allocated to reportable segments.

Corporate assets mainly include excess funds (cash and deposits) that cannot be allocated to reportable segments.

Depreciation and amortization of 9 million yen in other items is for corporate assets that cannot be allocated to reportable segments. The 52 million yen adjustment to an increase in property and equipment and intangible assets is the sum of corporate assets that are not allocated to reportable segments.

2. Segment profits are adjusted with operating income shown on the Consolidated Statements of Income.

3. In the current fiscal year, due to changes in the purpose of holding certain assets, 8,831 million yen of assets that were in the Real Estate Investment Business have been transferred to the Real Estate Leasing Business. The resulting increase in Real Estate Leasing Business assets is included in an increase in property and equipment and in intangible assets.

FY2014 (Jan. 1, 2014 – Dec. 31, 2014)

(Millions of yen)

	Reportable segment			Total	Adjustment (Note 1)	Amount recorded in the Consolidated Statements of Income (Note 2)
	Asset Management Business	Real Estate Investment Business	Real Estate Leasing Business			
Revenue						
External sales	7,646	7,712	10,852	26,212	-	26,212
Inter-segment sales and transfers	1,007	-	-	1,007	(1,007)	-
Total	8,654	7,712	10,852	27,220	(1,007)	26,212
Segment profits	4,347	2,680	2,556	9,584	(1,436)	8,147
Segment assets	7,175	43,613	133,367	184,155	19,112	203,268
Other items						
Depreciation and amortization	37	0	1,270	1,309	11	1,320
Impairment loss	-	-	2,196	2,196	10	2,206
Investment in equity-method affiliates	531	8,062	-	8,594	-	8,594
Increase in property and equipment and intangible assets	113	1	94,162	94,277	20	94,297

Notes: 1. The (1,436) million yen adjustment to segment profits includes corporate costs that cannot be allocated to reportable segments. Corporate costs mainly include general and administrative expenses that cannot be attributed to reportable segments.

The 19,112 million yen adjustment to segment assets includes corporate assets that cannot be allocated to reportable segments. Corporate assets mainly include excess funds (cash and deposits) that cannot be allocated to reportable segments.

Depreciation and amortization of 11 million yen in other items is for corporate assets that cannot be allocated to reportable segments. The impairment loss adjustment of 10 million yen is for corporate assets that cannot be allocated to reportable segments.

The 20 million yen adjustment to an increase in property and equipment and intangible assets is the sum of corporate assets that are not allocated to reportable segments.

2. Segment profits are adjusted with operating income shown on the Consolidated Statements of Income.

Per Share Information

(Yen)

	FY2013 (As of Dec. 31, 2013)	FY2014 (As of Dec. 31, 2014)
Net assets per share	268.27	290.62
Net income per share (basic)	8.29	18.24
Net income per share (diluted)	-	18.22

Notes: 1. Net income per share (diluted) for FY2013 is not stated, because dilutive shares do not exist.

2. The Company conducted a 100-for-1 common stock split on July 1, 2013. Net assets per share and net income (loss) per share have been calculated as if this stock split had taken place at the beginning of the FY2013.

3. The basis of calculating the net assets per share is as follows.

(Millions of yen)

Item	FY2013 (As of Dec. 31, 2013)	FY2014 (As of Dec. 31, 2014)
Total net assets on the Consolidated Balance Sheets	74,341	85,351
Net assets applicable to common stock	71,268	77,206
Breakdown of differences		
[Stock acquisition rights]	[44]	[110]
[Minority interests]	[3,028]	[8,035]
Number of common shares outstanding (Shares)	265,658,200	265,658,200
Number of common shares of treasury stock (Shares)	-	-
Number of common stock shares used in calculation of net assets per share (Shares)	265,658,200	265,658,200
Increase in the number of common shares (Shares)	-	257,227

4. The basis of calculating the net income per share (basic) and net income per share (diluted) is as follows.

(Millions of yen)

	FY2013 (Jan. 1, 2013 – Dec. 31, 2013)	FY2014 (Jan. 1, 2014 – Dec. 31, 2014)
Net income per share (basic)		
Net income	1,985	4,844
Net income not available to common stock shareholders	-	-
Net income applicable to common stock	1,985	4,844
Average number of common shares outstanding during the period (Shares)	239,492,525	265,658,200
Summary of dilutive shares not included in the calculation of “net income per share (diluted)” since there was no dilutive effect.	In the current fiscal year, the 257,800 common stock equivalents for stock options were not included in the calculation of net income per share (diluted) because the exercise of these stock options would not have a dilutive effect.	-

Material Subsequent Events

On January 6, 2015, the Kenedix Group signed an agreement with Kenedix Retail REIT Corporation for the sale of trust beneficiary rights (fixed assets) owned by a Kenedix consolidated subsidiary to this REIT.

The sales agreement will become effective only if the following two conditions are met. First, the investment units of Kenedix Retail REIT must be listed on the REIT securities market of the Tokyo Stock Exchange. Second, Kenedix Retail REIT must complete the procurement of the funds required by the agreement to purchase the trust beneficiary rights (using measures that may include but are not limited to loans and the sale of stock) by no later than the transaction closing date.

1. Reason for sale

Supporting the growth of Kenedix-related J-REITs and altering the composition of assets held by selling real estate are one of the major initiatives of the medium-term management plan that Kenedix announced on February 14, 2013 (and subsequently partially revised on August 9, 2013).

2. Description of assets to be sold and use of assets prior to the sale

Four trust beneficiary rights for trusts that hold retail facilities and land

3. Outline of purchaser

Kenedix Retail REIT Corporation

4. Schedule

Transaction closing date: February 10, 2015 or another date agreed to by the seller and purchaser

5. Selling price

31,517 million yen (total for all four trust beneficiary rights)
